

CRM Security & Data Protection

UK & USA Compliance Guide · March 2026

letsgo@xillio.io

24/7

Autonomous AI operation

AES-256

Encryption standard

UK + USA

Compliance coverage

Executive Summary

Xiilio.ai is an AI-driven lead generation and autonomous growth platform operating 24/7. As a platform that processes sensitive customer and prospect data, robust security and data protection are foundational to sustainable growth and client trust.

End-to-End Encryption

All data protected in transit and at rest with AES-256 & TLS 1.3

Zero-Trust Access

MFA, RBAC, and adaptive authentication across all accounts

AI Threat Detection

Real-time anomaly monitoring and automated incident response

Dual-Market Compliance

Full UK GDPR/DPA 2018 and US CCPA/state law compliance

Independent Assurance

SOC 2 Type II, ISO 27001, Cyber Essentials, annual pen testing

Privacy by Design

Security built into architecture — not bolted on afterwards

Xiilio.ai & the CRM Ecosystem

What Xiilio.ai Does

Xiilio.ai combines AI agents, performance marketing, and intelligent CRM connectivity to deliver a continuous pipeline of qualified leads — autonomously, around the clock.

Data Processed Daily:

- Prospect & lead contact data
- Behavioural & engagement data
- CRM records (Salesforce, HubSpot, Pipedrive)
- Third-party enriched data
- Client business & sales strategy information

24/7 Autonomous

AI agents operate around the clock with no human intervention required

CRM Integration

Seamless, scoped connection to leading CRM platforms with data minimisation controls

Targeted Outreach

AI analyses thousands of prospects per minute, delivering precision-targeted campaigns

Encryption & Access Control

TLS 1.3

Transport

All data in transit encrypted with TLS 1.3. Older protocol versions disabled.

AES-256

At Rest

All stored data encrypted to financial/government-grade AES-256 standard.

E2E Pipelines

AI Workflows

AI agent sequences operate within encrypted channels end-to-end.

Key Rotation

Management

Keys stored separately from data, rotated on defined schedules.

Access Control Architecture

Multi-Factor Auth

MFA required for all accounts. Hardware security keys for privileged users.

Role-Based Access

Least-privilege RBAC enforced. Each role accesses only what the job requires.

Adaptive Auth

AI assesses login risk by device, location, time & behaviour — adds steps when needed.

Session Controls

Time-limited sessions, auto-expiry on inactivity, concurrent session prevention.

AI-Powered Threat Detection & DLP

Threat Detection Capabilities

Real-Time Anomaly Detection

AI monitors user behaviour, API calls & access logs continuously. Suspicious activity triggers automated alerts.

Fraud Prevention

Transaction patterns and login sequences are analysed to detect and block fraudulent activity instantly.

Prompt Injection Protection

Specific controls prevent malicious inputs from hijacking AI agents to exfiltrate data.

Supply-Chain Security

All third-party integrations are assessed; contractual data-handling requirements enforced on every partner.

Automated Incident Response

Confirmed threats trigger automatic isolation, credential revocation & security team alerts within seconds.

Data Loss Prevention

- Admins define sensitivity classification rules to prevent unauthorised data export
- AI monitors all data movement in real time
- Export and download activity logged with full audit trails
- AI agents access only the CRM fields required for each specific task
- Suppression lists enforced automatically across all outreach campaigns

United Kingdom: UK GDPR & DPA 2018

Regulated by the Information Commissioner's Office (ICO)

Lawful Basis

Legitimate interest for B2B prospecting; consent available where required. Documented per activity.

Purpose Limitation

Data not repurposed without appropriate disclosure and, where necessary, fresh consent.

Data Subject Rights

Access, rectification, erasure, portability & objection — exercisable via self-service portal.

International Transfers

UK IDTAs or adequacy decisions govern all transfers of UK personal data outside the UK.

Data Minimisation

AI agents collect only the personal data necessary for the specific task at hand.

Storage Limitation

Automated retention policies ensure data is held only as long as operationally necessary.

DPIA Requirement

Data Protection Impact Assessments conducted for all high-risk AI processing activities.

ICO Registration

Xiilio.ai maintains appropriate ICO registration as controller and/or processor.

United States: CCPA & State Privacy Laws

A patchwork of state laws plus sector-specific federal regulations

CCPA / CPRA Rights

Consumers may know, opt-out & delete. Xillio.ai never sells personal data without disclosure.

Privacy Notices

Clear, plain-language notices explain all data collection and AI-driven processing practices.

CAN-SPAM / TCPA

All AI outreach configured with required opt-out links; suppression lists enforced automatically.

FTC AI Guidance

Fairness, transparency and explainability principles applied to all AI lead scoring models.

Opt-Out Mechanisms

Where AI processes customer PII, opt-out rights are clearly disclosed and technically enforced.

Expanding State Laws

Ongoing monitoring of VA, CO, CT, TX and other state privacy laws as they come into force.

Sector-Specific Rules

Additional HIPAA or GLBA controls available for healthcare and financial services clients.

Federal Privacy Watch

Xillio.ai monitors emerging federal privacy legislation to adapt proactively ahead of enactment.

UK vs USA: Side-by-Side Comparison

Requirement	UK (UK GDPR / DPA 2018)	USA (CCPA / State Laws)
Lawful Basis	Legitimate interest, consent, or contract	Business purpose; sector consent where required
Individual Rights	Access, rectify, erase, port, object	Right to know, delete, opt out of sale
Data Transfers	UK IDTA or adequacy decision required	SCCs for EU; state laws evolving
Breach Notification	ICO within 72 hrs; individuals without undue delay	State AG: 30–90 days; sector rules apply
AI Processing	DPIA required; AI Act alignment considered	FTC guidance on fairness; sector rules emerging
Data Retention	Defined schedule; automated deletion enforced	Purpose-limited; deletion within 45–90 days

Data Governance & Privacy by Design

Privacy by Design

- Privacy impact review before every deployment
- Data minimisation enforced at architecture level
- Most privacy-protective defaults configured by default

Consent & Transparency

- Consent withdrawal technically enforced
- AI explainability traces every prediction
- Plain-language processing notices for all individuals

Audit Trails

- Tamper-evident logs of all data access & changes
- Retained per UK and USA regulatory minimums
- Exportable for compliance investigations

Vendor Management

- Pre-engagement security assessments mandatory
- Data processing agreements per GDPR Art. 28
- Regular compliance review of all sub-processors

Incident Response & Business Continuity

01 Detect

AI monitoring flags anomaly instantly. Incident classified by severity.

02 Contain

Automated isolation of affected systems. Compromised credentials revoked.

03 Notify

Clients, regulators (ICO / State AGs) and individuals notified within required timelines.

04 Recover

Tested BCP & DR plans invoked. RTO / RPO targets met. Full post-incident review.

Regulatory Notification Timelines

UK ICO

72 hours

After becoming aware of breach

UK Individuals

No undue delay

If high risk to rights & freedoms

US State AGs

30–90 days

Varies by state and sector

Clients

Immediately

Ahead of or alongside regulatory notice

Security Certifications & Independent Assurance

SOC 2 Type II

Annual independent assessment of security, availability, integrity, confidentiality & privacy controls.

ISO 27001

Systematic, risk-based approach to protecting all information assets via certified ISMS.

Penetration Testing

Regular third-party pen tests simulate real-world attack scenarios to identify and remediate vulnerabilities.

GDPR Readiness

Annual UK GDPR compliance assessment covering DPIAs, data flows, and sub-processor agreements.

Cyber Essentials (UK)

UK Government certification confirming fundamental cyber hygiene controls are in place and verified.

Shared Responsibility Model

Xiilio.ai Secures

- Platform infrastructure & AI agent pipelines
- End-to-end encryption in transit and at rest
- Zero-trust authentication architecture
- Real-time AI threat monitoring & DLP
- Regulatory compliance framework
- Security certifications & audits
- Incident detection & response

Client Configures

- Maintain accurate user account records
- Enforce MFA for all staff accounts
- Review RBAC configurations regularly
- Keep privacy notices up to date
- Conduct DPIAs for high-risk activities
- Maintain Article 30 processing register
- Train staff on social engineering threats

Security. Compliance. Trust.

Xillio.ai's security framework is built for the most rigorous data protection environments in the world — the United Kingdom and the United States. Because the next top performer isn't just capable. It's trustworthy.
